

Which type of space are you most likely to pursue at this point? *(Check one)*

Adapt existing space

Acquire a new space

Build a new space

What are the key factors contributing to this choice (consider cost, proximity, design, etc)?

-
-
-

If you do not have clarity on which type of space to pursue, what are the outstanding questions?
Consider employee needs, number of children to be served, etc.

-
-
-

SPACE NEEDED (based on guidance from the [National Association for the Education of Young Children](#))

| | | |
|--|----------------------|---------------------------------|
| Based on the data collected on the employee needs assessment, our best estimate is to have: | <input type="text"/> | # of seats |
| Multiplying that number of slots by 50 sq ft for classroom space, I assume we will need approximately : | <input type="text"/> | Sq ft of classroom space |
| Multiplying that number of slots by 100 sq ft for total facility space, I assume we will need approximately: | <input type="text"/> | Sq ft of total space |
| Outdoor space will vary with the age groups served and number of children, but based on multiplying 35% of the number of slots by 75 sq ft, I assume we will need approximately: | <input type="text"/> | Sq ft of outdoor space |
